

Table *. Special status species with potential to occur in the Galbreath Wildlands Preserve. We follow convention in listing plants alphabetically by family. All other species are listed alphabetically by order then family. "Quad Search" column indicates if the species was documented as occurring in a 16 quad search of CNDDDB or USFWS databases centered on the Galbreath Preserve. Species known to occur on the Preserve are marked with an "x." (Note that potential habitat evaluations were conducted for all species on this list except those showing only an MBTA or ABC listings).
